

Modernize content portfolio and conquer content sprawl with Intellective's Federated Content and Workflow Strategy

Value delivered

- Perform content services discovery including classification of content, usage and flow
- Design a pragmatic Enterprise Content Services Strategy that balances the goal of minimizing content platforms with company needs and time to market.
- Consolidate identified content platforms without business disruptions
- Federate and Integrate remaining platforms to ensure all are working in unison
- Use Intellective's proprietary low code integration and migration framework to reduce cost, time, project and business risks.

Intellective Unity capabilities

- Connect CRM systems and business applications to one or more repositories, content and workflow systems
- Federated Content and Workflow Management
- Custom metadata creation
- Federated search using specialized indexing
- In-place document and workflow item updates
- Actionable analytics across multiple content systems and repositories
- Migrate and transform documents, metadata, and cases between various enterprise repositories in real-time
